

## Coastal and Upland Wetland Restoration of Kaho‘olawe, HI

### (NAWCA U.S. Small Grants)

(*Cressa truxvillensis*) percentages remained the same. There was an increase in invasive buffel grass (*Cenchrus ciliaris*). Future accesses will focus on the removal of the buffel grass.

- x May access focused on the removal of buffel grass in the Makihi herb land.
- x Several kiawe (*Prosopis pallida*) stumps re-sprouted and will be recut and treated with herbicide during the June access.

Native Makihi (*Cressa truxillenses*) has expanded into the area where kiawe was removed at Keanakeiki.
